Slidedeck instructions

Less words, more images on slide

Feel free to update colors & fonts, but don't let it distract from your invention

Write out notes for presentation - make sure every one on the team has a part

Practice, practice, practice!!!

(delete this slide)

Your Spiffy Team Name

Your Names:

The Need Statement

- Describe the problem you are solving

Your Solution

- Include pics of
  - Design sketch
  - Different stages of prototype

The Process:

- How did you got to your end product, take time to explain the whole process your team went through (even the ideas that didn't work, and why, and Ah-ha moments!!)
- Say something for each:
    1. **Empathize:** What did you learn from empathy assignment & how did it help with your design?
    2. **Ideate:** What were some crazy post-it note ideas you had before narrowing down?
    3. **Prototype:** What did you try to do while prototyping?
    4. **Test:** What did you learn from testing your prototype?

Conclusion

- Re-State your design Need and Solution
  - And the main reason it ROCKS! – in case anyone forgot
- The reason you felt compelled to choose this to design
- What would you do next to improve it?
